Syndromic indicators at a glance:

| Indicator | Trend | Level * |
|----------------------|------------|----------------------------|
| Cold/flu | increasing | similar to baseline levels |
| Fever | no trend | similar to baseline levels |
| Cough | increasing | similar to baseline levels |
| Difficulty breathing | no trend | above baseline levels |
| Sore throat | increasing | similar to baseline levels |
| Diarrhoea | no trend | below baseline levels |
| Vomiting | increasing | similar to baseline levels |
| Eye problems | no trend | below baseline levels |

*Since week 47 2014 new baselines have been introduced for comparison with previous years. Baselines use historical data from the NHS Direct surveillance system to estimate seasonal trend but with levels adjusted to reflect changes since the switch to using NHS 111 data in September 2013.

Data summary:

| Year | Week | Total calls |
|------|------|-------------|
| 2016 | 39 | 202,819 |

WW Public Health England

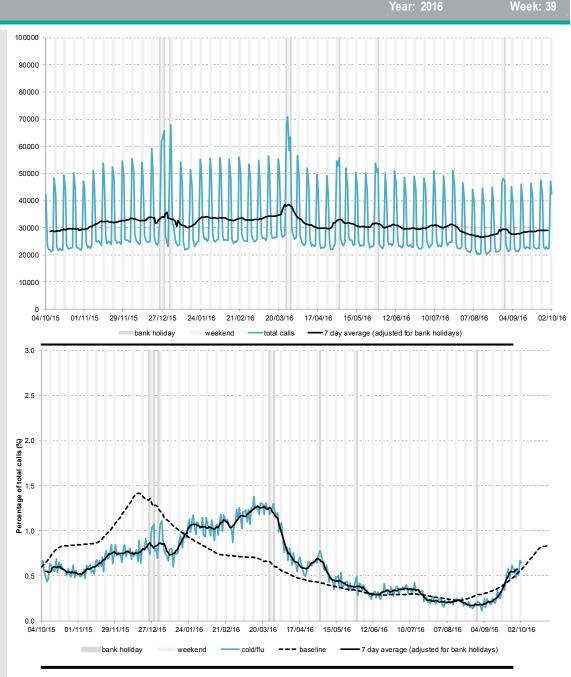

04 October 2016

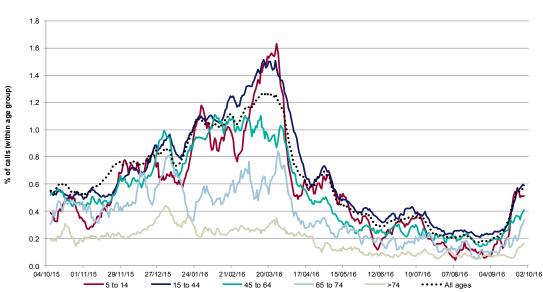

1: Total calls.

The total number of syndromic calls recorded each day by NHS 111.

2: Cold/flu

Daily 'cold/flu' calls as a percentage of total calls. Baselines are constructed from historical data since 2010, including data from NHS 111 and NHS Direct.

2a: Cold/flu calls by age group

Cold/flu calls as a percentage of total calls within each age group, shown as a 7 day moving average adjusted for bank holidays. Age groups below 5 years old, not shown.

Remote Health Advice

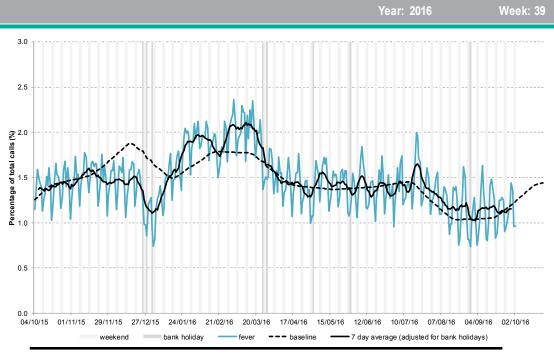

04 October 2016

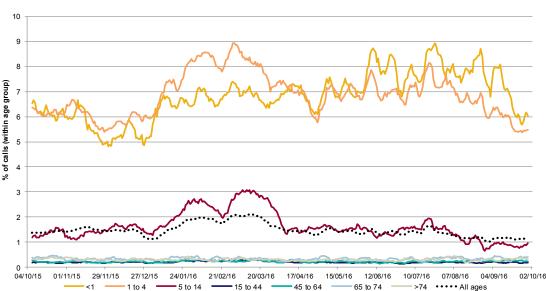

3: Fever

Daily 'fever' calls as a percentage of total calls. Baselines are constructed from historical data since 2010, including data from NHS 111 and NHS Direct.

Fever calls as a percentage of total calls within each age group, shown as a 7 day moving average adjusted for bank holidays.

Daily 'cough' calls as a percentage of total calls. Baselines are constructed from historical data since 2010, including data from NHS 111 and NHS Direct. 14

6: Sore throat

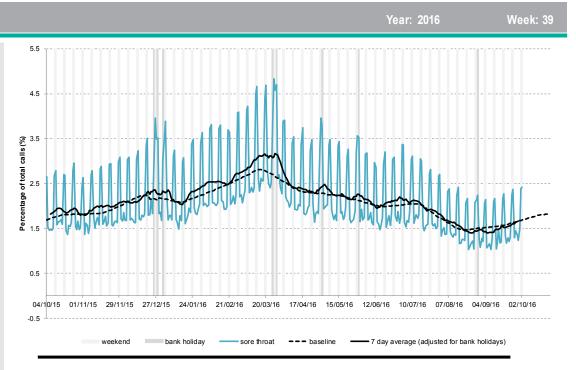

Daily 'sore throat' calls as a percentage of total calls. Baselines are constructed from historical data since 2010, including data from NHS 111 and NHS Direct.

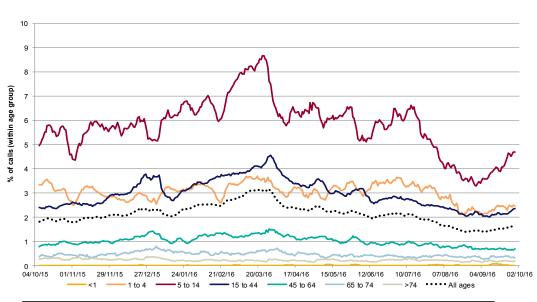

6a: Sore throat by age group

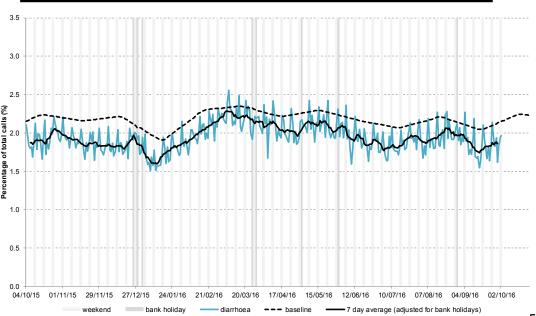

Sore throat calls as a percentage of total calls within each age group, shown as a 7 day moving average adjusted for bank holidays.

7. Diarrhoea

Daily 'diarrhoea' calls as a percentage of total calls. Baselines are constructed from historical data since 2010, including data from NHS 111 and NHS Direct.

| 04 October 2016 | Year: 2016 Week: 39 |
|---------------------------------------|--|
| Introduction to charts: | Weekends and bank holidays are marked by vertical grey lines (bank holidays darker grey). A 7-day moving average (adjusted for bank holidays) is overlaid on the daily data reported in each chart, unless specified. Baselines represent seasonally expected levels of activity and are constructed from historical data. Furthermore, they take into account any known substantial changes in data collection, population coverage or reporting practices. Baselines are refreshed using the latest data on a regular basis. This new syndromic surveillance system is still under development and further analyses at PHE Centre level will be included in future bulletins. NHS 111 call data are analysed on a daily basis to identify national and regional trends. A statistical algorithm underpins each system, routinely identifying activity that has increased significantly or is statistically significantly high for the time of year. Results from these daily analyses are assessed by the ReSST, along with analysis by age group, and anything deemed of public health importance is alerted by the team. |
| Notes and further information: | Further information about NHS 111 can be found at: http://www.nhs.uk/NHSEngland/AboutNHSservices/ Emergencyandurgentcareservices/Pages/NHS-111.aspx The Remote Health Advice Syndromic Surveillance bulletin can also be downloaded from the PHE Real-time Syndromic Surveillance website which also contains more information about syndromic surveillance: https://www.gov.uk/government/collections/syndromic-surveillance-systems- and-analyses |
| Acknowledgements: | We are grateful to NHS 111 and to NHS Digital for their assistance and support in providing the anonymised call data that underpin the Remote Health Advice Syndromic Surveillance System.
