Syndromic Surveillance System: England

19 July 2016		Year: 2016	Week: 28	
In This Issue:	Key messages	Data to: 17 Jul	y 2016	
Key messages.				
Syndromic indicators at a glance.	There were small increases in heat/sun stroke and insect bite calls during the weekend of 16/17 July, which remain within expected seasonal levels		0	
Data summary.	(figure 10, 10a, & 11, 11a).			
Indicators by syndrome.				
Cold/flu.	Sore throat calls also increased in 5-14 years (fig	jure 6a).	e 6a).	
Fever.				
Cough.				
Difficulty Breathing.	A Heat-Health Watch system operates in England from 1 June to of the Heatwave Plan for England, the PHE Real-time Syndromic			
Sore throat.	routinely monitoring the public health impact of hot weather using syndromic surveillance data during this period.			
Diarrhoea.	Heat-health watch level (current reporting week): level 1 Summer prepa	redness		
Vomiting.	http://www.metoffice.gov.uk/weather/uk/heathealth/			
Eye problems.				
Introduction to charts	Syndromic indicators at a glan	ce:		

Introduction to charts.

Notes and further information.

Acknowledgements.

Level \* Indicator Trend Cold/flu no trend similar to baseline levels Fever no trend similar to baseline levels Cough no trend above baseline levels Difficulty breathing above baseline levels decreasing Sore throat no trend above baseline levels Diarrhoea similar to baseline levels no trend above baseline levels Vomiting no trend Eye problems decreasing above baseline levels Heatstroke no trend above baseline levels

\*Since week 47 2014 new baselines have been introduced for comparison with previous years. Baselines use historical data from the NHS Direct surveillance system to estimate seasonal trend but with levels adjusted to reflect changes since the switch to using NHS 111 data in September 2013.

### Data summary:

Year	Week	Total calls
2016	28	211,411

#### 1: Total calls.

2: Cold/flu

Direct.

percentage of total

calls. Baselines are constructed from historical data since

2010, including data

The total number of syndromic calls recorded each day by NHS 111.

#### Intentionally blank

#### 鯋 Public Health England

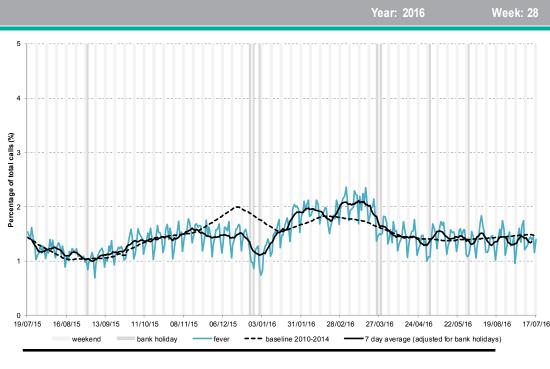

#### 19 July 2016

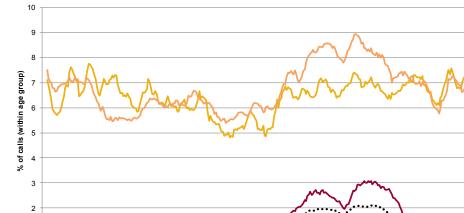

#### 3: Fever

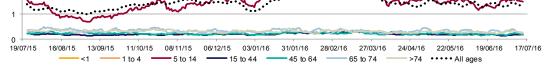

Daily 'fever' calls as a percentage of total calls. Baselines are constructed from historical data since 2010, including data from NHS 111 and NHS Direct.

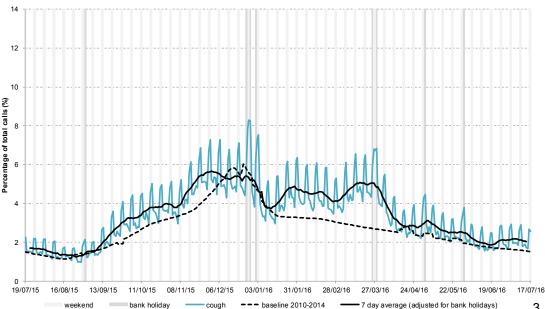

#### 3a: Fever calls by age group

Fever calls as a percentage of total calls within each age group, shown as a 7 day moving average adjusted for bank holidays.

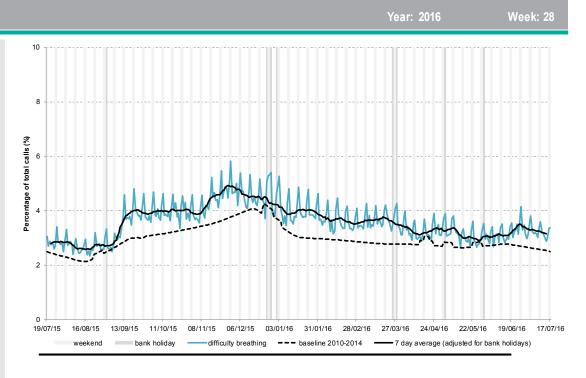

#### 4: Cough

Daily 'cough' calls as a percentage of total calls. Baselines are constructed from historical data since 2010, including data from NHS 111 and NHS Direct.

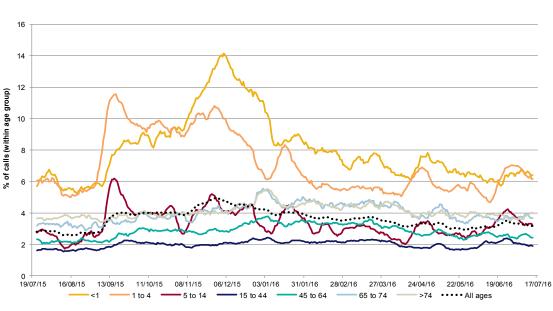

#### 5: Difficulty breathing

Daily 'difficulty breathing' calls as a percentage of total calls. Baselines are constructed from historical data since 2010, including data from NHS 111 and NHS Direct.

### 5a: Difficulty breathing calls by age group

Difficulty breathing calls as a percentage of total calls within each age group, shown as a 7 day moving average adjusted for bank holidays.

#### Intentionally blank

#### 6: Sore throat

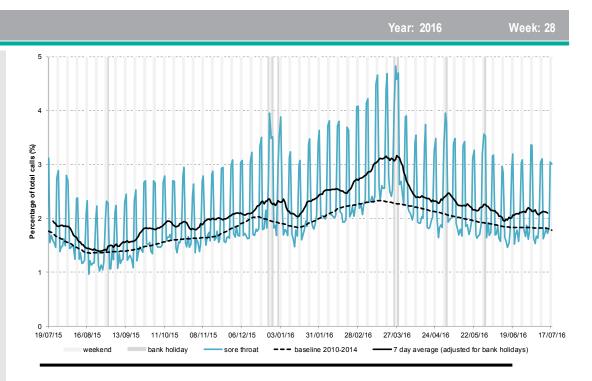

Daily 'sore throat' calls as a percentage of total calls. Baselines are constructed from historical data since 2010, including data from NHS 111 and NHS Direct.

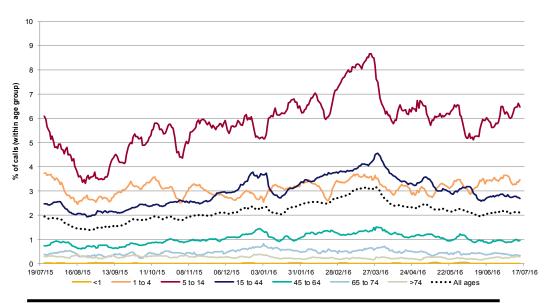

### 6a: Sore throat by age group

Sore throat calls as a percentage of total calls within each age group, shown as a 7 day moving average adjusted for bank holidays.

#### 7. Diarrhoea

Daily 'diarrhoea' calls as a percentage of total calls. Baselines are constructed from historical data since 2010, including data from NHS 111 and NHS Direct.

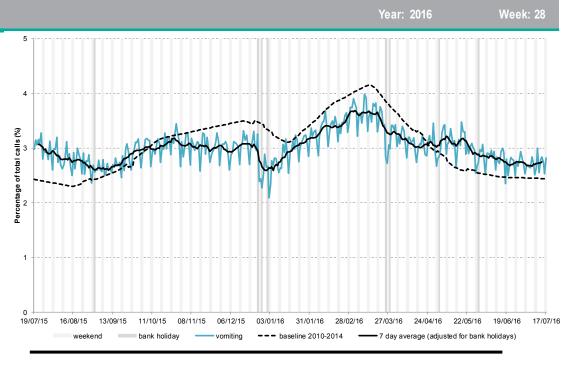

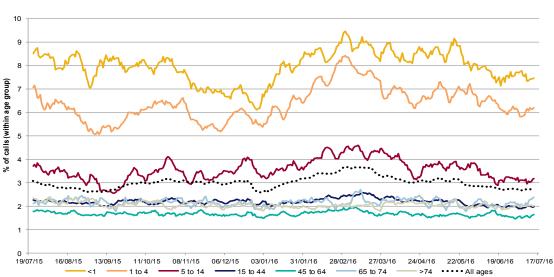

#### 8: Vomiting

Daily 'vomiting' calls as a percentage of total calls. Baselines are constructed from historical data since 2010, including data from NHS 111 and NHS Direct.

Vomiting calls as a percentage of total calls within each age group, shown as a 7 day moving average adjusted for bank holidays.

### **Remote Health Advice**

19 July 2016	Year: 2016 Week: 28		
Introduction to charts:	• Weekends and bank holidays are marked by vertical <b>grey</b> lines (bank holidays <b>darker grey</b> ).		
	<ul> <li>A 7-day moving average (adjusted for bank holidays) is overlaid on the daily data reported in each chart, unless specified.</li> </ul>		
	• Baselines are constructed using historical data, including data from both NHS111 and the NHS Direct syndromic system (which was replaced by NHS 111 data in September 2013). Seasonal trends reflect the average over past years, with levels adjusted to reflect differences between NHS 111 and NHS Direct data.		
	<ul> <li>This new syndromic surveillance system is still under development and further analyses at PHE Centre level will be included in future bulletins.</li> </ul>		
	• NHS 111 call data are analysed on a daily basis to identify national and regional trends. A statistical algorithm underpins each system, routinely identifying activity that has increased significantly or is statistically significantly high for the time of year. Results from these daily analyses are assessed by the ReSST, along with analysis by age group, and anything deemed of public health importance is alerted by the team.		
Notes and further information:			
monitation	Further information about NHS 111 can be found at:		
	http://www.nhs.uk/NHSEngland/AboutNHSservices/ Emergencyandurgentcareservices/Pages/NHS-111.aspx		
	The Remote Health Advice Syndromic Surveillance bulletin can also be downloaded from the PHE Real-time Syndromic Surveillance website which also contains more information about syndromic surveillance:		
	https://www.gov.uk/government/collections/syndromic-surveillance-systems- and-analyses		
Acknowledgements:	We are grateful to NHS 111 and to HSCIC for their assistance and support in providing the anonymised call data that underpin the Remote Health Advice Syndromic Surveillance System.
