Syndromic Surveillance System: England

05 July 2016		Year: 2016	Week: 26
In This Issue:	Key messages	Data to: 03 Jul	ly 2016
Key messages.			
Syndromic indicators at a glance.	Sore throat calls increased in week 26, particul (figures 6 & 6a).	larly in 5-14 years	age group
Data summary.			
Indicators by syndrome.	Difficulty breathing calls decreased in week 26, (figure 5). Also, eye		
Cold/flu.	problems calls in children aged 5 to 14 years decreased (figure 9a).		
Fever.			
Cough.			
Difficulty Breathing.	A Heat-Health Watch system operates in England from 1 June of the Heatwave Plan for England, the PHE Real-time Syndroi		
Sore throat.	routinely monitoring the public health impact of hot weather using syndromic surveillance data during this period.		
Diarrhoea.	Heat-health watch level (current reporting week): level 1 Summer pre	eparedness	
Vomiting.	http://www.metoffice.gov.uk/weather/uk/heathealth/		
Eye problems.			

# Syndromic indicators at a glance:

Indicator	Trend	Level *
Cold/flu	no trend	similar to baseline levels
Fever	no trend	below baseline levels
Cough	no trend	above baseline levels
Difficulty breathing	decreasing	above baseline levels
Sore throat	increasing	above baseline levels
Diarrhoea	no trend	similar to baseline levels
Vomiting	no trend	above baseline levels
Eye problems	no trend	above baseline levels
Heatstroke	no trend	below baseline levels

\*Since week 47 2014 new baselines have been introduced for comparison with previous years. Baselines use historical data from the NHS Direct surveillance system to estimate seasonal trend but with levels adjusted to reflect changes since the switch to using NHS 111 data in September 2013.

## Data summary:

Year	Week	Total calls
2016	26	206,999

### 1: Total calls.

The total number of syndromic calls recorded each day by NHS 111.

100000

### 2: Cold/flu

Daily 'cold/flu' calls as a percentage of total calls. Baselines are constructed from historical data since 2010, including data from NHS 111 and NHS Direct.

### Intentionally blank

#### 3: Fever

Daily 'fever' calls as a percentage of total calls. Baselines are constructed from historical data since 2010, including data from NHS 111 and NHS Direct.

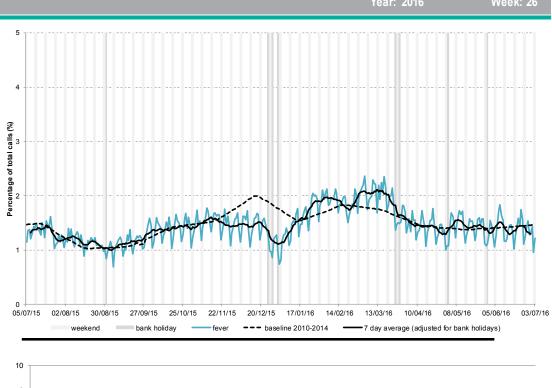

### 3a: Fever calls by age group

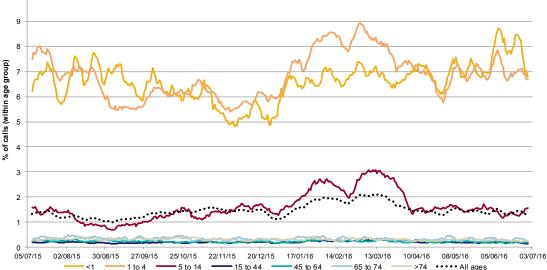

Fever calls as a percentage of total calls within each age group, shown as a 7 day moving average adjusted for bank holidays.

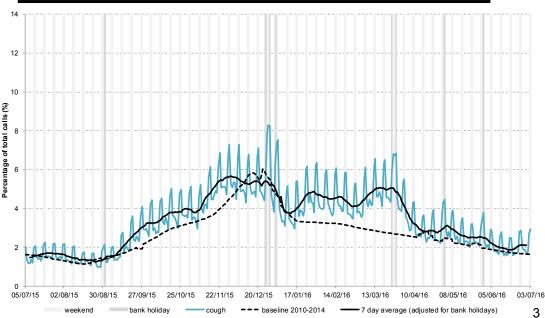

### 4: Cough

Daily 'cough' calls as a percentage of total calls. Baselines are constructed from historical data since 2010, including data from NHS 111 and NHS Direct.

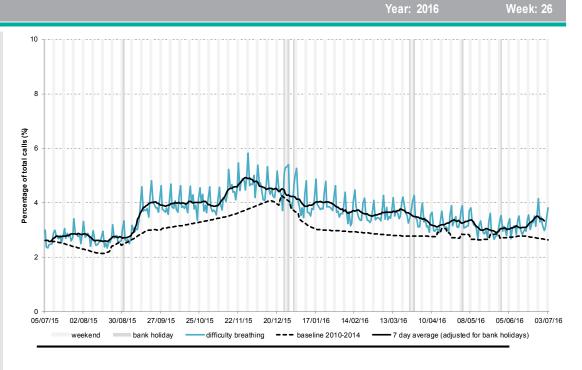

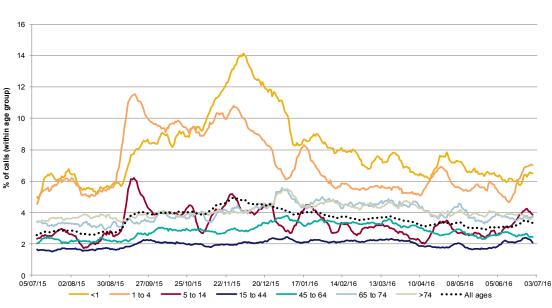

### 5: Difficulty breathing

Daily 'difficulty breathing' calls as a percentage of total calls. Baselines are constructed from historical data since 2010, including data from NHS 111 and NHS Direct.

# 5a: Difficulty breathing calls by age group

Difficulty breathing calls as a percentage of total calls within each age group, shown as a 7 day moving average adjusted for bank holidays.

### Intentionally blank

### 6: Sore throat

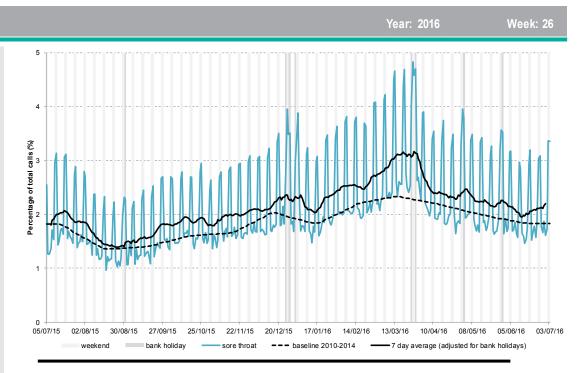

Daily 'sore throat' calls as a percentage of total calls. Baselines are constructed from historical data since 2010, including data from NHS 111 and NHS Direct.

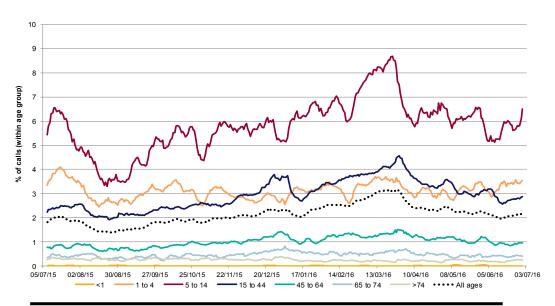

# 6a: Sore throat by age group

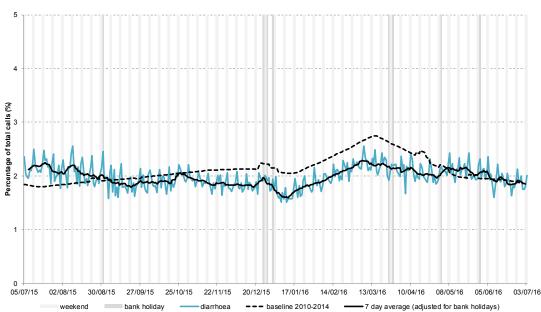

Sore throat calls as a percentage of total calls within each age group, shown as a 7 day moving average adjusted for bank holidays.

Daily 'diarrhoea' calls as a percentage of total calls. Baselines are constructed from historical data since 2010, including data from NHS 111 and NHS Direct.

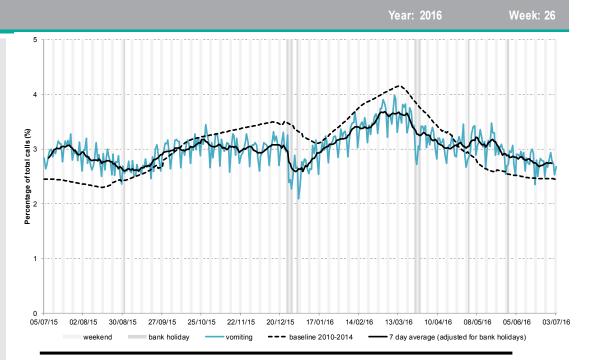

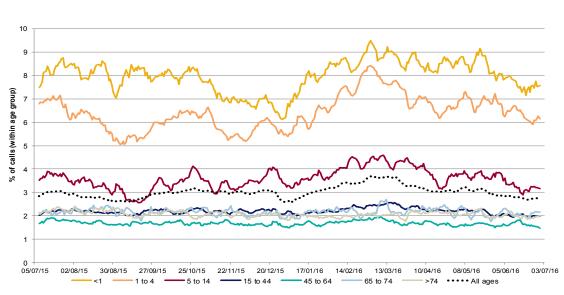

### 8: Vomiting

Daily 'vomiting' calls as a percentage of total calls. Baselines are constructed from historical data since 2010, including data from NHS 111 and NHS Direct.

Vomiting calls as a percentage of total calls within each age group, shown as a 7 day moving average adjusted for bank holidays.

### Intentionally blank

### 9: Eye problems

Daily 'eye problems' calls as a percentage of total calls. Baselines are constructed from historical data since 2010, including data from NHS 111 and NHS Direct.

### 9a: Eye problems by age group

Eye problems calls as a percentage of total calls within each age group, shown as a 7 day moving average adjusted for bank holidays.

11: Insect bites

Daily 'insect bites' calls as a percentage of total calls. Baselines are constructed from historical data since Sept 2013.

# 11a: Insect bites by age group

'Insect bites' calls as a percentage of total calls within each age group, shown as a 7 day moving average adjusted for bank holidays.

### **Remote Health Advice**

05 July 2016	Year: 2016 Week: 26
Introduction to charts:	<ul> <li>Weekends and bank holidays are marked by vertical grey lines (bank holidays darker grey).</li> </ul>
	<ul> <li>A 7-day moving average (adjusted for bank holidays) is overlaid on the daily data reported in each chart, unless specified.</li> </ul>
	<ul> <li>Baselines are constructed using historical data, including data from both NHS111 and the NHS Direct syndromic system (which was replaced by NHS 111 data in September 2013). Seasonal trends reflect the average over past years, with levels adjusted to reflect differences between NHS 111 and NHS Direct data.</li> </ul>
	<ul> <li>This new syndromic surveillance system is still under development and further analyses at PHE Centre level will be included in future bulletins.</li> </ul>
	• NHS 111 call data are analysed on a daily basis to identify national and regional trends. A statistical algorithm underpins each system, routinely identifying activity that has increased significantly or is statistically significantly high for the time of year. Results from these daily analyses are assessed by the ReSST, along with analysis by age group, and anything deemed of public health importance is alerted by the team.
Notes and further	
information:	Further information about NHS 111 can be found at:
	http://www.nhs.uk/NHSEngland/AboutNHSservices/ Emergencyandurgentcareservices/Pages/NHS-111.aspx
	The Remote Health Advice Syndromic Surveillance bulletin can also be downloaded from the PHE Real-time Syndromic Surveillance website which also contains more information about syndromic surveillance:
	https://www.gov.uk/government/collections/syndromic-surveillance-systems- and-analyses
Acknowledgements:	We are grateful to NHS 111 and to HSCIC for their assistance and support in providing the anonymised call data that underpin the Remote Health Advice Syndromic Surveillance System.
